Totalized rainfall of precipitation

Types of rainfall

Artzanal rainfall of precipitation

Rainfall

- Continuous registration of precipitation through a graph called pluviogram (precipitation heights as a function of time).

- Data registration is done by means of a registrar penalty;

Types of rainfall

Floating (or buoy) rainfall: precipitation measurement

Types of rainfall

- Container connected to a

balanca system

self-delighted

coupled to the penalty

Recommendations

- rainfall and • install as far as possible to vegetation, constructions, roads, etc.,

Rainfall

that provoke interference in

rainwater capture;

- Install at an average height of 1.5

soil meters to make it more

representative of local precipitation and

easy access for maintenance;

- Surround a small area around

of the device to avoid approaching

of animals and some kind of

Vandalism.Meake of precipitation

Rainfall/rainfall installation
